Red River Creates the Red River Technology Foundation

Lebanon, NH – March 11, 2009 – Red River Computer Company, Inc. an integrator of information technology solutions for the federal government, state and local governments, higher education and the healthcare marketplace, announced the formation of the Red River Technology Foundation.

The foundation is a tax-exempt, non-profit organization that aims to promote technology knowledge, education and experience among area students. This is accomplished through scholarships, donations of IT equipment as well as time and resources to schools, and hosting student workshops with technology manufacturers. The ultimate goal is to expand this fund into an endowment that will benefit current and future generations of children in the City of Claremont public school system; Sullivan County New Hampshire school system; and other educational institutions in the Upper Valley Region of Vermont/New Hampshire (Sullivan County, NH; Grafton County, NH; Windsor County, VT). The funding for the Foundation comes primarily from our annual charity golf tournament. This year it is being held at Lake Sunapee Country Club in New London, NH on July 9, 2009. If you are interested in playing or being a sponsor please contact Kim Vacca at kim.vacca@redriver.com.

On February 18, 2009 the Claremont School board formally accepted the donation of IT equipment valued at \$5000 from the Red River Technology Foundation. Claremont, NH is the future home of Red River's corporate headquarters. This donation follows Red River's commitment to give back to the local community through the Red River Technology Foundation. The donated IT equipment created a much more responsive network for the teachers and students; as well as, a more efficient backup solution for the Claremont School District IT staff. Dan Suse, Systems Administrator for the Claremont School District commented on how much this donation helped; "Immediately, I noticed a very big difference," said Suse. "This has opened up several doors for us. I'm very excited to start planning a path to utilize this new functionality."

"By giving me the opportunity to put my technical expertise to use with the Claremont School District, Red River put their words to action when it comes to giving back to the community," said Chris Scelza, Systems Engineer at Red River. "Community service is embedded into the culture of Red River, making it a great place to work. I really look forward to working with the school district in the future through our Foundation."

Red River strives to be a responsible corporate citizen. It is our objective to participate in the development and growth of our work community. As a charitable foundation and as individual citizens, we are dedicated to improving the quality of our community and its members. We understand that a community is only as strong as its members and pro-active participation is the critical component to a strong and vibrant society.

“As a company, we stress the importance of philanthropic involvement in the community, said Rick Bolduc, CEO Red River. We will award scholarships each year to students with a desire to pursue a technology focused educational path. This is just the beginning of Red River’s contribution to the community in which we live and work.”
