

Red River Security Overview

Cyber Security

As federal and commercial enterprises innovate through adoption of cloud, IoT and mobility, the looming threat of a cyber attack from internal and external threats is still top of mind in the boardroom and operations center. Understanding how these new risks affect an organization's mission is essential to protecting the enterprise before, during and after an attack.

Key solutions:

- Risk Management
- Data Security
 - Secure Application Development
 - Security Data Analytics
 - Data Loss Prevention
 - Content Security
 - Quantum resistant entropy
 - Advanced Malware Prevention
- Infrastructure Security
 - Network threat detection
 - Network and User behavioral analytics
 - Network Access Control
 - Secure Guest and BYOD enablement
 - Deception
 - Encrypted traffic visibility
 - Endpoint Security
 - Secure Cloud Enablement
 - Secure Collaboration
- Managed Security Operations
 - Sustainment
 - Incident Response
 - Threat Hunting
 - Threat Intelligence

Key capabilities:

Red River is equipped to advise, implement, operate and optimize all phases of the Cyber Security framework:

- Identify potential threats
- Protect your assets and data
- Detect an attack
- Respond quickly to an attack
- Recover stolen or compromised data

Over the past 20 years, Red River has developed a proven risk-based methodology for assessing, developing, implementing and optimizing security solutions for defense, finance, healthcare and civilian agencies. Our highly-certified engineers are equipped with the expertise and solutions required to identify and remediate security risks to the data and systems that enable our customers' missions.

Understand Risks and Empower Security

When it comes to cyber security, Red River has established a robust framework and risk-based approach to developing solutions that enable proactive responses and increased visibility over networks, data and digital assets. Our security solutions are designed with an emphasis on threat visibility, ease of integration and response-driven automation to increase the human effectiveness and reduce human management and oversight demands. As a technology transformation company with a reputation for deep security, networking, data center and mobility expertise, Red River stands ready to design customized multi-vendor security solutions that integrate with your current infrastructure.

Cyber security deserves a tailored approach. For example, a healthcare facility and a commercial business will often have entirely different assets, risks, regulations and security goals. That's why Red River begins security assessments by understanding the specifics of each business or agency domain: What is the organization's mission? How should the data be protected? What platforms and systems does the organization have? Together, these questions define the associated risk.

Our highly-certified security consultants provide experienced guidance in evaluating, procuring, implementing and optimizing the right solutions to address evolving threat landscape and security challenges.

PROVEN APPROACH

Red River has a demonstrated track record of guiding agencies towards a stronger cybersecurity stance through our proven approach:

PLAN: Discover and collaborate.

We begin by validating the mission details and identifying and classifying risks through an understanding of your business, mission data, supporting systems and applicable regulations. Then we design a tailored solution that provides immediate impact, strategic risk reduction and leverages existing investments.

BUILD: Journey to Implement. In addition to the development and planning phase, Red River's engineering teams implement the solutions according to our best practices, which combine industry standards and proven experience.

RUN: Executing on the Mission. Cyber Security is a process, not an end-state. Once the solution is in place, we can help manage all or some of the solution components, allowing your teams to focus on the mission. Cyber Security requires constant vigilance. We help customers maintain or enhance their security posture and evaluate the effectiveness of security on as a major component of reducing mission risk.

Red River

Red River at a Glance

- Founded in 1995
- Privately-Held
- ISO 9001:2015 Certified
- SOC 2 Type 1 certified
- Corporate Headquarters in Claremont, NH
- Federal Office in Reston, VA
- Innovation Center in Austin, TX
- Development Office in Sacramento, CA

About Red River

Red River brings together the ideal combination of talent, partners and products to disrupt the status quo in technology and drive success for business and government in ways previously unattainable. Red River serves organizations well beyond traditional technology integration, bringing more than 20 years of experience and mission critical expertise in security, networking, analytics, collaboration, mobility and cloud solutions.

TRUST RED RIVER

Red River provides a wide array of capabilities and cutting-edge technology solutions designed to solve current challenges, optimize asset availability, and help you make meaningful technology investments that align with your top strategic goals. Red River delivers ongoing technology consulting, maintenance and support to ensure optimal success through an array of unique service offerings, including integrated Managed, Professional and Support Services. Whether you need help answering simple end-user inquiries with our 24x7x365 Network Operations Center, need to develop a path to the cloud, or implement new network security protocols, our certified experts are available to help.

OUR TEAM

Red River employees are highly trained, efficient and ethical professionals who take pride, ownership and responsibility in all engagements with customers and partners. Our team takes the time to understand the unique business challenges facing our customers, and work closely with you to optimize your current infrastructure, leverage new technology, facilitate compliance and maximize your return on investment as we build and deploy new solutions. By working in unison with our manufacturer, service and distribution partners, we deliver quality projects to our customers within time, scope and budget expectations.

OUR PARTNER ECOSYSTEM

Red River has strong relationships with a long list of elite partners, ranging from hardware to services to software. Our partner ecosystem includes global technology leaders that respect Red River's track record of excellence and our core mission of reimagining the possibilities of technology.
