

Design Engineering

Leverage Red River's engineering and consulting services as your trusted advisor to identify solutions for your mission and business problems.

Today's IT deployments are rarely plug-and-play. They typically involve multiple technology components from an array of OEMs and services that not only need to work together as a solution, but must also be supported by and integrated into your established infrastructure.

Red River's Design Engineering team is packed with highly-certified, highly-experienced engineers adept at finding the right technology to address your business problems. This team will provide technical leadership and work with you to investigate not only technical but business problems in order to build a proposal that will be the right solution.

Red River provides a specific approach to solving business problems and has great portfolio and experience with proven solutions such as Guest Wireless, Deployable IT, Analytics, Cloud PaaS, Data Center Management technologies, and IoT security segmentation.

In addition to specific solution design, our team has subject matter expertise within our Collaboration, Data Center, Network, Security and Mobility Practices to engineer and deliver innovative offerings that satisfy immediate challenges and provide a solid foundation for future growth and innovation.

A PROVEN APPROACH

The Red River Engineering teams engage our customers using a proven three-phased approach: Plan, Build, Run. After assessing your current IT and support infrastructure, Red River engineers work directly with your technical staff to PLAN appropriate solutions and services. We use your approved design document to BUILD custom offerings designed specifically to help you achieve your primary goals while addressing your business challenges. Finally, we help you RUN effectively

by providing the superior support services and customer care you need to succeed.

CONFIDENCE & EXPERTISE TO DO MORE

Leverage the strength of our Design Engineering team to identify and evaluate possible options that are right for your organization's mission. Our Design Engineering team will collaborate with you to develop a plan with a focus on your projects' success from design and budget, through timely deployment. With our expertise on your side, you gain the confidence and transparency to:

Expand Capabilities: Let our engineers take a deep dive into your mission or business requirements, assess your current infrastructure and skills portfolio, and design custom configurations and practical plans to expand your network, your core infrastructure, and your ability to adopt cloud services. We can also help you explore new topics around converged and virtual desktop infrastructures, advanced analytics, network and security intelligence, and so much more.

Right-Size Infrastructure: Our holistic approach helps you meet current and long-term demands with flexible, hyper-scalable technologies with right-sized storage, networking and bandwidth to meet today's needs, and those well into the future.

Improve Compliance: Red River understands the vital importance of compliance and works within highly-regulated industries and government agencies to design and deliver solutions that meet the most stringent security, information assurance and compliance standards.

Contact us to learn how Red River can help you meet today and tomorrow's demands on premises, in the Cloud and as a Service.

OUR EXPERTS AT YOUR SERVICE

Capabilities

- Mission-Focused Engineering
- Award-Winning OEM Expertise
- Technology Gap Assessments
- Roadmaps and Journey Map Planning
- Orchestrate Full-Scale Implementations
- Technology Advise and Recommendations

Key Benefits

- Reduce Risk
- Maximize IT Investments
- Upgrade and Utilize Established Infrastructure
- Lower Costs & Speed Deployments

Red River

Powerful Purchasing Vehicles

FULL LIFECYCLE APPROACH

Today's technology deployments are rarely plug and play. They typically involve multiple technology components and services from an array of OEMs and providers. Leverage Red River's engineering and consulting services as your trusted advisor to identify solutions for your mission and business challenges. Through our four service areas, we provide complete lifecycle IT management, from procurement to device management to data analytics.

TRUST RED RIVER

Red River provides a wide array of capabilities and cutting-edge technology solutions designed to solve current challenges, optimize available assets and help you make meaningful IT investments that align with your top strategic goals. We offer services across the full spectrum of technology – from selling and integrating technology infrastructure to developing software and custom applications to lifecycle services and support. Our key solution areas include Cloud, Analytics and Mobility. We also provide Professional, Managed and Support Services to maximize your technology investments. And our certified experts have the extensive expertise required to take on your toughest challenges as we work to secure the future of your enterprise infrastructure while lowering costs, reducing complexity and maintaining compliance.

OUR TEAM

Red River employees are highly trained, efficient and ethical professionals taking pride, ownership and responsibility in all engagements with customers and partners. Our team listens and understands your needs, and we match those needs to the best available technology solutions. By working in unison with our manufacturer, service and distribution partners, we deliver quality projects to our customers within time, scope and budget expectations.

OUR PARTNER ECOSYSTEM

Red River has strong relationships with a long list of elite partners, ranging from hardware to services to software. Our partner ecosystem includes global IT leaders that respect Red River's track record of excellence and our core mission of reimagining the possibilities of technology.
