

Managed Services

Empower end-users and free your IT staff to focus on meeting mission-critical objectives by utilizing Red River Managed Services solutions.

Gain immediate access to our highly trained IT specialists via our phone, email or web-based ticketing systems – or allow us to craft custom Managed Services solutions to meet your specific needs. Along with high-quality responsiveness that enhances productivity, we provide detailed documentation of IT incidents, requests and problem resolution to give you a comprehensive view of your enterprise's unique technical landscape.

Front-Office Managed Services Support

Red River's well-trained representatives are here to field questions from your end-users regarding desktops, servers (physical and virtual), networking, unified communications, storage as well as back-up and recovery. This frees your higher-level technology professionals from the menial tasks of day-to-day technology support and allows them to focus on their core competencies to address your essential challenges.

Back-Office Managed Services Support

Red River's skilled engineers are available 24/7/365 to respond to advanced technical inquiries from higher-level IT professionals such as System, Network and Database Administrators regarding servers, data centers, network infrastructure, security, storage, unified communications and more.

Onsite Support

Augment your Help Desk and reinforce your technical response team with onsite support from Red River. We can provide skilled onsite staff to deliver Level 2 and Level 3 support, so if a technology issue can't be resolved over the phone or via email, our representative can be at an end-user's desk in just a few minutes.

Cloud Offerings

Red River offers cloud-based services to fit your organization's business needs. We provide these offerings in three models: private, public and hybrid. Understanding the differences among cloud offerings can be overwhelming, and it's through our educational process that our team can help you prioritize your needs. Through our consultative approach, Red River will assess your current environment and provide recommendations on the most effective, scalable cloud-based service. We'll also define a migration and ongoing management and support program to fit your needs, both today and in the future.

DON'T GO IT ALONE

With Red River Managed Services solutions, you have all of the technology support and technical expertise you need to succeed. Whether you need help answering simple end-user inquiries or addressing advanced technology issues, our certified experts are always available to help. Red River uses only best-in-class support tools and we take a multi-vendor approach to Managed Services support, working directly with an array of OEMs to facilitate troubleshooting and follow incidents through to complete resolution instead of simply referring you to the manufacturer. You don't have to go it alone – turn to Red River for Managed Services solutions to improve end-to-end responsiveness, drive workplace productivity and maximize technology investments.

FULL LIFECYCLE APPROACH

Today's technology deployments are rarely plug and play. They typically involve multiple technology components and services from an array of OEMs and providers. Leverage Red River's engineering and consulting services as your trusted advisor to identify solutions for your mission and business challenges. Through our four service areas, we provide complete lifecycle IT management, from procurement to device management to data analytics.

TRUST RED RIVER

Red River provides a wide array of capabilities and cutting-edge technology solutions designed to solve current challenges, optimize available assets and help you make meaningful IT investments that align with your top strategic goals. We offer services across the full spectrum of technology— from selling and integrating technology infrastructure to developing software and custom applications to lifecycle services and support. Our key solution areas include Cloud, Analytics and Mobility. We also provide Professional, Managed and Support Services to maximize your technology investments. And our certified experts have the extensive expertise required to take on your toughest challenges as we work to secure the future of your enterprise infrastructure while lowering costs, reducing complexity and maintaining compliance.

OUR TEAM

Red River employees are highly trained, efficient and ethical professionals taking pride, ownership and responsibility in all engagements with customers and partners. Our team listens and understands your needs, and we match those needs to the best available technology solutions. By working in unison with our manufacturer, service and distribution partners, we deliver quality projects to our customers within time, scope and budget expectations.

A PROVEN APPROACH
